

AN AIA CT AND CTPH COLLABORATION

INTRO TO PASSIVE HOUSE

Thursday February 28 5:30-8:30 PM

370 James St. New Haven, CT

FREE EVENT worth 2 HSW units! REGISTER AT: www.aiact.org/events

Description: Passive House is the world's most rigorous building energy performance standard, requiring a significant reduction in energy consumption while yielding other benefits such as superior comfort, durability, resilience, and health. It can play a major role in our energy future, contributing to our reduction of greenhouse gas emissions by moving away from fossil fuel combustion.

This program is an introduction to Passive House, covering the core principles of Passive House standards and methodologies. It is appropriate for all audiences.

Learning Objectives:

1. Identify the 5 principles of the Passive House standard.
2. Explore each of the principles in detail.
3. Learn how to create a long-lasting, safer, healthy, and more comfortable environment.
4. Demonstrate how PH contributes to an overall strategy to reduce our carbon footprint.

Presented by CTPH Board Members:

Philippe Campus AIA, CPHD
George Penniman AIA, LEED AP, CPHD

Sara Holmes AIA, LEED BD+C, CPHD
Leonard Wyeth AIA, CPHD
